Climate Cleaners

Dylan Rodwell, Matthew Thompson, Jonathan Hagendoorn, Heath Lakey

Brief Game Description

- Top-down game themed around SDG Safari: Clean energy and climate action
- Repair clean energy solutions and remove pollution from a damaged world
 - Each level has some object you need to rebuild to unlock the next level
- Collect loot dropped from enemies to make better weapons

Brief Demo

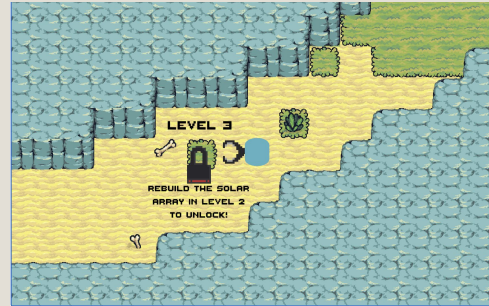

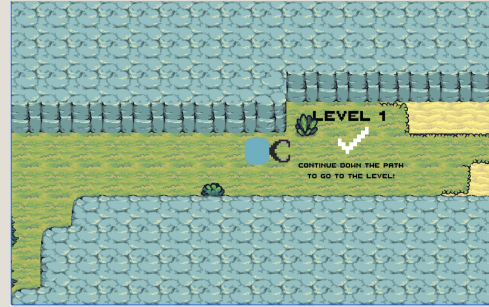

Year/Quarter/Month

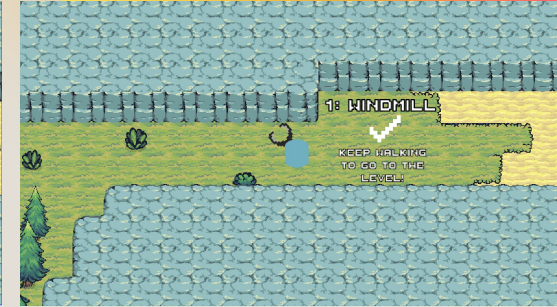

Feedback We Applied

1. ***“environmental message feels somewhat disconnected from the player’s actions”***
 - a. Added dialogue
2. ***“Further expanding on ambient or environmental sounds” *****
 - a. Added walking sounds
3. ***To improve usability, consider: Labelling levels, clear instructions showing where to go next.”***
 - a. Gave levels better names than just “Level 1”, “Level 2”
 - b. Added dialogue that tells the player exactly where to go / do next
4. ***“in the menu, include return path options, like ‘back to main”***
 - a. Added a save & quit option
5. ***“include commentary feedback text like ‘Level Unlocked’ and ‘Goal Achieved”***
 - a. Added dialogue

before

after

Feedback We Applied

6. “no strong audio or visual cues for key actions”

- Added item pickups to UI
- Added stronger visuals to level completion

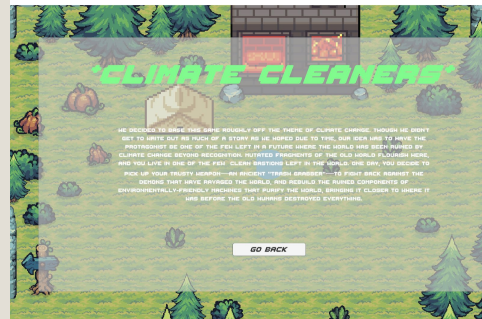

7. “innovation features like smoother transitions, screen flash, saving & loading progress, pollution decreases as goals achieved”

- Added fade in/out transition, added variable spawnpoint depending on origin scene
- Added active scene & dialogues played to save data
- Added Screen flash & Level “regrows” upon completion

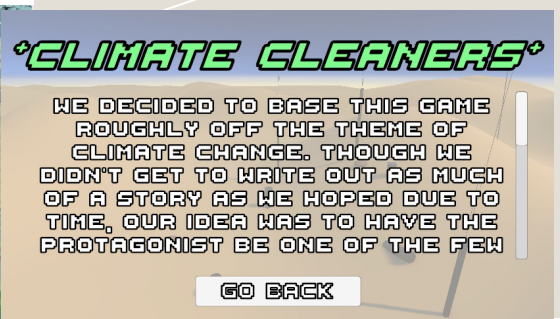

8. “font size and colour contrast could be improved”

- Added border around text to improve readability and increased default font sizes
